ENGAGE WITH ELECTRIC COOPERATIVES,

and you'll understand the true meaning of partnership. Electric cooperatives are local, member-owned energy and technology providers whose paramount mission is to enrich their communities with safe, reliable, affordable power. They embrace their role as stewards of our nation's critical infrastructure, investing billions of dollars annually to maintain and improve the equipment that serves 42 million consumer-members nationwide. Cooperatives are some of the most innovative, thoughtful and forward-looking leaders in the energy sector, and right now, they're managing unprecedented change as the electric industry is in the midst of a technological revolution. Cooperatives are also working together in consortiums to secure billions of dollars in new federal infrastructure funding, a years-long initiative that will have a profound impact on how co-ops maintain and modernization their grids.

NRECA reaches virtually every electric cooperative in America. By associating your brand with this trusted source of education, information and advocacy, you will become a partner in the co-op journey and have the opportunity to champion their future success.

As a statewide manager, I read the magazine to keep up with industry news. But more importantly, it's the only publication that highlights the unique offerings and experiments taking place at co-ops across the country. It generates ideas and it strengthens our network by sharing these stories.
